TMVA overtraining check for classifier: BDTA

Kolmogorov-Smirnov test: signal (background) probability = 0.296 (0)

Legend:
- Signal (test sample)
- Background (test sample)
- Signal (training sample)
- Background (training sample)

Y-axis: $(1/N) \, dN / dx$

X-axis: BDTA response

Right axis: U/O-flow (S,B): (0.0, 0.0)% / (0.0, 0.0)%
